

## The Kube System Portable

The Kube Systems Portable has the same device charging functionality as the Kube System Clock, but without the clock and speakers. It contains a large rechargeable battery and is designed for use in public areas, restaurants, bars, conference rooms, and club rooms, where your guests can charge their devices at their table, without the need for your staff to look after your guests' property. And because the devices can only be recharged on the Kube System Portable's docking station, there is no incentive for theft

### Features Include:

- + Premium multi-device charger for up to six devices at once
- + System available as a set of Kube units and a charging tray
- + Hardware is degradable with replaceable cables for Apple Lightning, Apple 30-pin, Micro USB
- + Optional Qi 'drop and charge' wireless charging
- + Recharging tray the only way to charge a Kube unit
- + Time limit settings for each Kube unit
- + Security tethering option
- + Possibility to co-brand with property logo
