

The Kube Systems Clock

The Kube Systems Clock is a multi functioning device that can charge up to six devices simultaneously. Suitable for virtually every smart phone and tablet on the market, it has two auto sensing USB ports and optional Qi wireless charging for Samsung devices on top. As well as working as an intuitive one day only alarm clock, the KS Clock offers an in-room sound system with Bluetooth music player.

The Kube System was designed specifically for hotels to eliminate the built-in obsolescence of devices with fixed docking stations, in a small but efficient size. It also has guest-loved features such as automatic dimming in low light, and housekeeping-loved features such as the option for automatic daylight savings changes and accurate time retention even if unplugged.

Features Include:

- + Premium multi-device charger for up to six devices at once
- + High quality Bluetooth speaker for audio streaming
- + Hardware is degradable with replaceable cables for Apple Lightning, Apple 30-pin, Micro USB
- + Optional Qi 'drop and charge' wireless charging
- + Single use alarm resets daily
- + Simple intuitive controls
- + Custom adjustment of features available
- + Security tethering option
- + Possibility to co-brand with property logo
- + Available in black or white
